Sir

Please recall our discussion at KAL we had on 31st October 2019 at your office. In continuation and as discussed, I am summarizing the important points that were discussed.

Mohandas College of Engineering and Technology is desirous of associating with KAL and some time back an MOU was signed for the Institute – Industry Interaction programmed with KAL. The copy of the MOU is attached for as annexure -1 ready reference.

MOU was intended for providing training by KAL to faculty and students of the institute and this is very important activity through which the industry imparts the experiences and current trend in the technology to the students. Over and above, feasibility of carrying some of the below mentioned activities can be brought under the scope of Institute – Industry Interaction programme.

1. Encouraging the students for long term technical activities for developing useful outputs
2. Enabling students to carry out the project works
3. Industrial visit to the students for creating awareness
4. Short period industry familiarization programme for the faculty /students
5. Expert technical lectures by KAL to the institute
6. Derive support of the faculty on R&D topics
7. Any other tasks mutually beneficial

I request you to kindly look into the matter and do the needful.

With best regards

B. Sivasubramanian
