

FINISHING SCHOOL

Objectives of the Practice

- To strive for Cent Percent Placement of the eligible students of our College.
- To act as a single window nodal point for career counselling and higher education.
- To set up the Orientation program and select the professional and non professional Technical and non-technical courses of students.
- To enlighten the students about the learning objectives around the world to conduct interrelationships between the professional and non- professional bodies.

The Context

- This concept has been promoted to use education and enlighten the students about the learning objectives around the world

The Practice

- Every year our college has form a committee and selects the area to motivate the Intermediate student's culture by our students.
- The committee members are very pertinent for higher technical education system to professional and non- professional study relationship.
- This orientation program would provide every student a much expected opportunity of boundless growth through an integrated structure of world education activities.

Evidence of Success

- Our students created the awareness among the junior students about the importance of education.
- More engineering seats are filled to college by this practice. Problems Encountered and Resources Required
- Students are distressed to take part in activities because of lack of confidence.
- Training and counselling the students to improve their communication skills and confidence
